Abstract. We continue studying the problem of analytic approximation of matrix functions. We introduce the notion of a partial canonical factorization of a badly

This book delineates the various types of factorization problems for matrix and operator functions. The problems originate from, or are motivated by, the theory of

Limit Operators and their Applications in Operator Theory. operator theory and related topics. The Israel Gohberg Singular integral operators on

Factorization of matrix functions and singular integral operators. Factorization of matrix functions and singular integral operators Operator theory, advances and
