Sphere definition, a having the shape or form of a sphere: bathysphere. 2. indicating a spherelike enveloping mass: atmosphere. Derived Forms

Sphere is the second of A. R. Ammons's long poems following Tape for the Turn of the Year and preceding Garbage that mark him as a master of this particular form.

A sphere (from Greek sphaira, "globe, ball") is a perfectly round geometrical object in three-dimensional space that is the surface of a completely

It can be helpful to think of very basic lens forms in terms of prisms. Recall, as light passes through a prism it is refracted toward the prism base.

For the sphere the center of every osculating circle is at the center of the sphere and the focal surface forms a single point. This is a unique property of the sphere.
